

Best of Communities: 13. Cooperative Economics and Creating Community Where You Are

On the three-legged stool of sustainability, less attention has been given to economics than to the more robust ecological and social dimensions. But that doesn't mean it's less important. (It's hard to keep a stool upright with only two legs.) Half the articles in this bundle are focused on what we're learning about values-based ways to make a living (which is a quality of life issue if there ever was one). The other stories are devoted to taking the inspiration of community beyond the boundary of shared property. If you figure that there are only 100,000 people in the US living in some form of self-identified intentional community, yet 100 million wanting a greater sense of community in their life, it's obvious that we should be exporting what we're learning to neighborhoods, churches, schools, and workplaces almost everywhere. Half of the 20 articles in this bundle focus on that expansive task. The Cooperative Economics and Creating Community Where You Are digital article compilation includes:

1. Recipe for a Thriving Community by Jonathan Dawson, #119
2. Regaining Our Sense of Oneness through Localization by Helena Norberg-Hodge, #154, 1516
