

Beyond Catalina - Pacific Cruising in a Pre-digital Age

During any season the tracks of yachties can be traced all around the Pacific Ocean. Beyond Catalina is the story of one sailor who left his comfort zone behind in a quest for excitement and adventure at sea. He set out during the 1970s prior to the advent of the digital age, thereby being numbered amongst the last generation of yachties to rely on sextant, chronometer and complex navigation tables. By his own admission the author often finds he is out of his depth. But then, on a 32-foot yacht nothing could have prepared him for a freak wave breeding ground or marauding greybeards from the Southern Ocean.
