

Breeding Ground

Lenora was just a normal teenage girl who never really cared much about her parents work as scientists. Everything changed the day they died in a mysterious explosion. Now Lenora is alone with no time to grieve because her own life is being threatened. Whatever her parents were working on there are people willing to kill for it, and they don't believe that Lenora has no idea what it is. Shot up and facing certain death, Lenora is rescued by a strange seductive man who explains her parents top secret research to expose aliens living on Earth. An elixir reveals snake-like aliens disguised as humans are taking over the planet, and Lenora must decide if she can depend upon the stranger who violated her trust. Armed with sarcasm, her parents research, and an ally she loathes, Lenora must continue her parents work to expose the alien threat and save the Earth before it's too late.
