

Educational Psychology: Developing Learners Value Package (includes Case Studies: Applying Educational Psychology)

A leading text for introductory educational psychology courses, Jeanne Ormrod's *Educational Psychology: Developing Learners* is known for its exceptionally clear and engaging writing, its in-depth focus on learning, and its extensive concrete applications. Its unique approach helps students understand concepts by encouraging them to examine their own learning and then showing them how to apply these concepts as teachers. The book concentrates on core ideas and gives students an in-depth understanding of the central ideas of educational psychology. It helps students truly see and better understand the children and adolescents they will one day teach. More than any other educational psychology text, this text moves seamlessly between theory and applications, features the most extensive and integrated coverage of diversity, and includes innumerable concrete examples--video cases, written cases, student artifacts, and more--to help students connect educational psychology to real children and classrooms. Some new features of the sixth edition include: * an even more accessible text with simplified, and more focused presentation of the core principles; * margin notes that highlight the core concepts and their applications to teaching; * an integrated text and media package that accompanies every new copy of the text that prepares students for their own classroom, supplemented by the *Understanding Research and Building Teaching Skills Lab Manual* on CD; an access code to Merrill's Teacher Preparation Classroom Website (www.prenhall.com/teacherprep); and access to the new Ormrod Teacher Prep Course (www.prenhall.com/ormrod) which provides a Study Plan, a collection of Pretest and Posttest assessments supported by study material, homework and exercises for students to apply chapter content and build teaching skills. The book's six

chapters on learning, wealth of practical applications, and innovative learning package make this the best text to prepare tomorrows teachers.
