

Real Hip Hop Gangsters

The entertainment industry is notorious for attracting the criminal element. After all, it is one of the few fields whereby your faults suddenly become assets. In its inception, Hip-Hop was initially, for myself and other hustlas of the time, just another hustlea fun, fast, risk-free and relatively easy one. It was also a ticket off the streets. Once Hip-Hop showed market potential, corporate America had to, whether they liked it or not, welcome its new players. New players meant new rules. Hip-Hop was a gangstas paradise. By the Eighties you couldnt tell the gangsters from the execs. In the Nineties the game was deep with thugs. Labels sold more than just music. Executives and artists were getting popped. Coastal turf wars got out of control. On-record beefs and old street beefs started causing people to get beaten up and shot. All the while the cash registers kept on ringing and Hip-Hop made people rich. But Hip-Hop was no longer just business it had gotten personal.
