

Creating Small Scale Social Programs: Planning, Implementation, and Evaluation (SAGE Human Services Guides)

This book is geared towards designing programmes to meet specific social needs and organizing the relevant community and social service resources to implement them. Structured around a single case study, the book clearly illustrates how to effectively plan, implement and evaluate a small scale social programme. Each step in the planning process is introduced and described in a way that allows the reader to vicariously participate in the evolution of the programme. Useful charts, time lines and resource lists are included and can be easily referenced and utilized.
