

## Home Is Where the Boat Is

Home Is Where the Boat Is is an entertaining and informative report on the lifestyle of adventures who cruise the oceans in small sailboats. Written for sailors and laymen alike and for anyone who has ever dreamed of sailing off into the sunset, it is a lively and honest account of the pros and cons of cruising. Chapters include getting food and water, doing laundry, making a living, meeting the natives, surviving storms and sickness. The book is also a love story about the author, a journalist, and the typical yachtie with whom she spent 13 years sailing halfway around the world, visiting scores of tropical paradise.
