

Exploring Information Technology (Exploring Science)

This series is directly aimed at the National Curriculum Science 5-16, levels 3 to 6. It covers a wide range of topics. Each book has a structured development of its scientific content, giving the reader a clear progression through the topic. The books contain illustrated activities, accompanied by record-keeping and self-assessments. Focusing on information technology, this book discusses its importance, the most up-to-date methods of using it, how logical decisions are made and how logic can be used to control information.
