

# The Evolution of U.S. Strategic Command and Control and Warning

This book covers the fear that top U.S. government officials had of decapitation, that the Soviets would launch a first strike against the White House and other government command-and-control facilities and thereby destroy U.S. capabilities to launch a coordinated response. This eye-opening Institute for Defense Analyses [IDA] study, *The Evolution of U.S. Strategic Command and Control and Warning* provides significant detail on those concerns as they developed from the late 1950s into the early 1970s.
