

Greenshanks (Poyser Monographs)

Desmond Nethersole-Thompson has been studying his favourite bird, the greenshank *Tringa nebularia*, since May 1932. This book, published in 1976, owes much to the interest, almost an obsession, of the Nethersole-Thompson family. The two girls and four boys, as well as both parents, now work as a team in the wild and beautiful north-west Highlands of Scotland. Greenshanks has drawn heavily on the teams field notebooks. In the gneiss country of Sutherland, so different from the forest bogs of Spey Valley, Fennoscandia and the Soviet Union, they have particularly concentrated on the greenshanks displays and breeding, food and feeding behaviour and its remarkable voice. There can be few long-term projects on waders to equal this made by the Nethersole-Thompsons, and there are valuable specialist contributions by other eminent ornithologists. Greenshanks is a major contribution to bird studies and takes its place beside Desmond Nethersole-Thompsons four earlier monographs. The illustrations in colour and monochrome by Donald Watson have all the veracity and atmosphere that one has come to expect of this gifted artist.
