

Hardwired: The 10 Major Traits of Women Hardwired By Evolution That Can Save The World

This is a book for women. It is also a book for men who support the causes women are interested in, or who are simply curious about the 10 special traits that women possess. These 10 major traits, hardwired into a woman's brain by Evolutionary Biology, are exactly the opposite of those hardwired in men. And, they are the very traits that a great leader needs today, in order to successfully manage our complex, volatile world. The truth is, these 10 important traits of women are needed in leadership roles at all levels of society. Hardwired, they represent a major paradigm shift that once understood, will forever change the way we look at leadership, relationships, politics, and the workplace. In fact, these hardwired differences relate to every single human being on the planet, and every single human endeavor. They show up in the way we respond to relationships, the workplace, to politics, to economics, to the environment, to raising children, to adolescents, to marriage, and about 100 other major topics. So, if there truly is a need to Save the World, there needs to be a quantum shift toward women in leadership roles at all levels of society. Alexia Parks concludes this book of powerful insights with one final, BIG insight. And that is how women can step into leadership roles virtually overnight.
