

## Improve Your Eyesight with EFT\*: \*Emotional Freedom Techniques

Based on an experiment conducted by EFT Master, Carol Look, Improve Your Eyesight with EFT invites you to improve your vision by releasing pent up emotions stored in your eyes. Emotions such as fear, guilt, anger and shame show up in every other part of our anatomy and physiology, why not in our eyesight? Considering that few doctors or lay people even entertain the idea that our eyesight could be improved by balancing our energy system with a simple method such as Emotional Freedom Techniques (EFT), the final results of the experiment were nothing short of fantastic. Approximately 75% of participants reported between a 15-75% improvement in their vision. . . . just from tapping on acupuncture points while focusing on their emotions! EFT is the ideal tool to address emotional blocks that have been preventing you from seeing clearly.
