

Notetaking Guide Geometry

The Notetaking Guide contains a lesson-by-lesson framework that allows students to take notes on and review the main concepts of each lesson in the textbook. Each Notetaking Guide lesson features worked-out examples and Checkpoint exercises. Each example has a number of write-on lines for students to complete, either in class as the example is discussed or at home as part of a review of the lesson. Each chapter concludes with a review of the main vocabulary of the chapter. Upon completion, each chapter of the Notetaking Guide can be used by students to help review for the test on that particular chapter.
