

# Computer Fundamentals and Applications for Business (Microcomputer applications for business series)

[The book] is designed for any first course on how word processing, spreadsheets, and database management are used in business.

This textbook presents a[n] ... approach to teaching fundamental computer concepts along with comprehensive sections on how to use DOS, WordPerfect, Lotus 1-2-3, and dBASE IV. Students learn to plan before they press keys. They learn to analyze the business problem and design their solution-whether it be a memo or letter, a worksheet or graphic, a query or a report. Then they solve the problem by following a ... step-by-step methodology, frequently referring back to their original plan. From this process students learn that word processing, spreadsheets, and database management are valuable tools to help make informed business decisions. -Pref.
