

## Because We Family! (Book 1) (Volume 1)

Some people might experience Deja vu, which is a feeling that something happening now seems to have experienced in the past. This condition might be caused by time-travel, which someone has travelled into the past and causes the original timeline disappearing. In the story of (Because We Are Family), in year 2032, a father breaches the security of a secret organization for sending his children into the past (2014). They intend to use the future medicine to save their mothers life. But this secret organization sends robots into the past, trying to catch them back in order to keep the balance of the universe. Is the father really a selfish man who will destroy the whole world for his family? What is the true scheme behind the time-travel? When the son and the daughter meet their young father in 2014, how different does their young-father from their future-father? Is their young-father able to protect his family? What is the UFO? Does alien really exist? (Because We Are Family) is a story about the theory of time-travel; a story about love.
