

SAT II Physics Revision: Comprehensive Revision Tool in the form of Concept Maps

A comprehensive revision tool for your SAT Physics Subject Test preparation. Key Features: - Revise like never before - One topic in just one Concept Map - Coloured themes grasp better What it includes? - 26 Physics Concept Maps covering all 5 modules of SAT Physics - 260 Practice Questions with detailed solutions for each What topics are covered in this book? - Kinematics - Projectile motion - Circular motion - Vectors - Force newtons laws - Work power energy - Center of mass - Law of conservation of momentum - Gravitation - Rotational motion - Simple harmonic motion - Properties of matter and fluid mechanics - Thermometry - First law of thermo dynamics - Waves and sound - Second law of thermo dynamics - Ray optics - Physical (wave) optics - Electro statics - Current electricity - Thermal and magnetic effects of electric current - Electro-Magnetic induction and ac circuits - Atomic physics - Nuclear physics - Electro-Magnetic waves & communication devices - Semi conductor devices What is a Concept Map? A Concept map is a colourful, visual form of representing key concepts covered in a chapter. It can be used as an effective overview, learning and revision tool. At its heart is a central topic of the chapter. This is then explored by means of branches representing main ideas, which all connect to this central idea. Concept maps are metacognitive tools that give students awareness towards the process of learning and allow the representation of knowledge structures in thematic fields. Why use a Concept Map? Brain is the key to effective learning for a student and more effectively the student uses it, the more successful he/she will be. If the brain of the student is stimulated with correct thinking and effective learning tools, excellent results can be obtained. Understanding lists, lines, sequences, letters and numbers is the work of the LEFT BRAIN. While interpreting

colour, images, rhythms and spatial awareness is the work of the RIGHT BRAIN. Through a Concept Map both Right & Left parts of the brain would be put into use. As a learning strategy, concept mapping stimulate learners commitment and interest towards the concepts, which is very important for better learning. Students can use it as tool for effective revision of not just the current class chapters but also the topics covered previously.
