

Starting Out with C++ 4/E Alternate (4th Edition)

In this Alternate Edition of Starting Out With C++, Gaddis makes a very detailed and slow-paced presentation of both programming and C++ syntax concepts so all readers will be able to follow along. Objects are introduced after control structures, functions, but before arrays and pointers, and the Standard library string class objects are used throughout. The book includes the hallmark pedagogical features that readers of Gaddis books have come to expect.
