

Tundra Experiments: 14 Science Experiments in One Hour or Less (Last Minute Science Projects With Biomes)

Award-winning author Robert Gardner comes to the rescue of busy students everywhere. Each experiment in TUNDRA EXPERIMENTS: 14 EXPERIMENTS follows the scientific method, and is designed to be completed in under an hour. Discover why a tundra stays wet when it receives little rain, finding the energy (heat) is needed to melt one gram of ice, build a model of the permafrost, and the science of solar heat and leaf color. There are also ideas for more science experiments if you have extra time.
