

# The Value Of Women In The Society: All Manufacturers Know The Value Of Its Products

The value of Women in the society is one of the best book that Rev. Lydor Brunice has ever written. This book focused on the fact that women are misunderstood around the world. Because when purpose is unknown abuse is inevitable. The purpose of a product and the truth about a product can only be revealed by the creator and the manufacturers of the products. That's why all manufacturers included a book inside each product to reveal the mind and the intent for its creation. The question is: Do you read the Manual of the Manufacturer first before you have tried to use the products if no, this book is dedicated specifically to you individually. Rev. Lydor Brunice primary focus is on the importance of women on earth. No one can transform a sperm into a generation except women could do that. In fact, women are bearers of lives to the benefit of the next generation
