

The Green Teen: The Eco-Friendly Teens Guide to Saving the Planet

Jenn Savedge's book is packed with tips that teens can easily do to green up the world that they inhabit. There are also a few more challenging actions (like starting a school recycling program) for those ready to take their environmentalism up a notch. Jenn has done an impressive job creating a straightforward, well-organized reference book full of tips, resources and advice for eco-friendly teens. She not only explains the hows of going green; she explains the whys too, and helps teens to understand the importance of the part they can play in caring for the planet. - Robin Shreeves, Mother Nature Network

Today's teenagers are standing at the crossroads of environmental history. Global warming will fundamentally change the world as they know it within their lifetime. But how to keep their healthy environmental awareness from becoming environmental anxiety? The secret is to provide them with education and tools for positive action. Written in easily accessible language, *The Green Teen* combines simple and quick eco-friendly tips, interviews with green teens, ideas for organizing and communicating environmental change, and a host of resources in a handy grab-and-go format. Teens will learn: How the choices they make each day impact the environment; How to fit eco-friendly decisions into their tight schedules and budgets; How to effectively get today's decision makers involved in environmental stewardship; Teens want to learn how to minimize their environmental impact at home, at school, and in their communities and get their concerns recognized by school officials, politicians, media, and even their own parents. *The Green Teen* is the book that will help them do it, and it is also a must-read for parents, grandparents, teachers, and school administrators who want to help the next generation make environmentally responsible choices. Jenn

Savedge is the author of *The Green Parent: A Kid-Friendly Guide to Earth-Friendly Living*, an avid environmentalist, and a recognized authority and frequent speaker on reducing the environmental impact of the family. Her articles have appeared in national print and on-line media, www.thegreenparent.com.
