

Monitor: The Story of the Revolutionary Ship and the Man Whose Invention Changed the Course of History

Monitor is the fascinating saga of the most famous ship in American history, of the Union it helped preserve, and the revolution it wrought. On May 9, 1862, an epic battle was fought that not only affected the course of the Civil War, it forever changed the face of naval warfare. A unique conjunction and events brought the Monitor and the Merrimac together on that day in Hampton Roads, the first battle of ironclad ships. 20 photos, maps & drawings.
