

Womens Interests: Articles from 1903

Dorothy Montefiore was an English-Australian womens suffragist and socialist. She also wrote poetry, and her autobiography - also available here on Kindle Here we present her collected articles from year 1903, originally published in assorted leftist magazines of the day. This book contains an active table of contents and it is the first ever e-book version of these works. The issues include: Women in public administration, feminism, socialism, women rights, womens suffrage, equality, strong women, herstory, unemployed, working class, labor union, strike, revolution. Quotes from the book: Womens interests are crowding in so rapidly upon me that I hardly know about which to write first. Before the story of the Convention, and of the work which it is to inaugurate is well told, there is the immediate and pressing interest of the Borough Council Elections, each will take place on November 2nd, and there is the very pleasant announcement to make of the formation of a Womens Labour Representation Committee, which is to be the turning point in a new departure in our methods of working for the suffrage. But I must try and speak by the book, for after all, the recent convention of political and municipal women workers was the focussing to a point of these various activities, and the heartening and cheering of these who had been perhaps inclined to grow faint and weary in the strife. That Convention would never have been held but for Mrs Wolstenholme Elmy and Mr. W.T. Stead. At the private meeting, held on October 17th, over ?500 was subscribed in the room and numerous yearly subscriptions were promised. Much more in this direction will have to be done, but when the fact is forced upon the attention of the public that the cause is once more a live one, the sinews of war we feel convinced will not be wanting. One interesting fact came out at a private dinner

which brought together some of the prominent workers. Dr. Steinthal, who presided at the afternoon session on the 16th, was brought up at a co-educational school, and has been a lifelong worker for women suffrage and for equality of opportunity between the sexes. He reminded us that the first real agitation as regards our cause grew out of an injustice, when at a conference, held in London for the abolition of slavery, women were excluded from some of the sittings. With hearts burning with a sense of injustice, the American women returned to their country and started the agitation for equal rights. Let the women of the present day take the lesson to heart, and, goaded by the sense of the injustice they have suffered, both under the Borough Council and the new Education Acts, let them renew and carry on their agitation to its logical conclusion, the granting of the political franchise to women on the same terms as it is or may be granted to men. The compensation for injustice is, that in that dark Ordeal we gather the worthiest around us. This, it seems to me, should be our motto for the forthcoming Convention. Those who are ready to come forward and publicly denounce an act of the grossest injustice perpetrated on the unrepresented will prove themselves, by that act, to be the worthiest in the land.
